

Hye-Green 0-0-20 Drip

LIQUID CONCENTRATE - CUSTOM BLEND

Read Entire Label Before Using This Product

0-0-20

GUARANTEED ANALYSIS:

Soluble Potash (K₂O).....20.0%

Derived from: Potassium Chloride, and Potassium Carbonate

GENERAL INFORMATION

0-0-20 is a water-soluble soil applied liquid fertilizer important to healthy plant development.

DIRECTIONS FOR USE

0-0-20 delivers a valuable source of Potassium for treating nutrient disorders in crops. 0-0-20 can be applied to increase nutrient availability to targeted crops. Application of 0-0-20 should be made based on soil, water and plant tissue analysis.

Soil Applied Rate

Apply 0-0-20 as a single or multiple applications with a minimum application rate of 5 gallons per acre. Application rates should be based on a complete soil and tissue analysis.

Fertigation Application

Fertigation programs should be designed to provide optimal nutrition over a desired period of time. Appropriate rates may also be determined by results and recommendations from soil and water samples. Application should not exceed the application rate of 2 to 4 gallons per acre per hour, when applied with high bicarbonate water. Applications should not exceed the application rate 20 gallons per acre per hour, when applied with low bicarbonate water. Apply 0-0-20 during the first 2/3 of the irrigation set, allowing for a complete material flush to complete the fertigation set. When using irrigation water with high bicarbonates, follow the minimum application rates. Do not apply to crops under stress or to transplants that are not well established. Application rates should be based on a complete soil and tissue analysis.
